Research Interest

Dr. Loar believes that research should be a part of any oncology practice and has succeeded in helping to bring clinical trials to the North Austin office so that his patients will have access to the most advanced and up to date care available.

Other Information

Originally from Savannah, Georgia, Dr. Loar graduated from the University of Georgia with a B.S. in Psychology. He received his medical degree from the Medical College of Georgia before completing his residency in Ob/Gyn at the University of Florida College of Medicine Jacksonville, where he stayed on as faculty prior to completing his fellowship in Gynecologic Oncology at the University of Michigan, a national pioneer in robotic surgery.

Conditions

Dr. Loar specializes in the care of women with gynecologic cancers including cervical, uterine or endometrial, ovarian, vulvar, vaginal cancers, gestational trophoblastic disease.

Procedures

Dr. Loar has extensive experience in minimally invasive surgery including laparoscopic and da Vinci robotic surgery, complex pelvic surgery, and radical surgery for advanced cancers, as well as chemotherapeutic and novel biologic treatments for gynecologic cancers.
