

Texas Oncology–Amarillo Cancer Center

At Texas Oncology–Amarillo Cancer Center, we help patients fight cancer in an advanced, supportive environment. Each of our physicians has special expertise in designated areas. Our patients have access to leading-edge technologies and treatments, and the latest research advances through clinical trials. As a comprehensive cancer center, our patients access much of their treatment in a convenient setting from a top-notch cancer care team, including medical oncology, radiation oncology, diagnostic imaging, and lab and pharmacy services.

Texas Oncology–Amarillo provides advanced cancer treatment technologies and services to patients, including:

- Chemotherapy
- Research and Clinical Trials
- Surgical Oncology
- Trilogy Linear Accelerator with Image-Guided Radiation Therapy (IGRT) technology and Cone Beam Computed Tomography (CBCT) Capabilities
- Rapid Arc Technology
- 3D Conformal Radiotherapy
- Intensity Modulated Radiation Therapy (IMRT)
- Stereotactic Body Radiation Therapy (SBRT)
- Positron Emission Tomography/Computed Tomography (PET/CT)
- Diagnostic CT
- Hereditary Cancer Risk Assessment
- Support Groups
- Values Assessment
- Advance Care Planning
- Benefit Counseling
- Full Service Retail Pharmacy

Last year, Texas Oncology–Amarillo patients were involved in nearly 30 clinical trials, including studies about bladder, breast, head and neck, lung, melanoma, prostate, and renal cancers, as well as the hematology disorders multiple myeloma and chronic myeloid leukemia.

Texas Breast Specialists

Texas Breast Specialists is a part of Texas Oncology. Texas Breast Specialists and Texas Oncology provide comprehensive breast care, including breast screening and diagnostic services, medical oncology, and radiation oncology for cancer and other breast diseases, all within the same family of physicians. We were the first clinic in the area to offer 3D screening and diagnostic mammography for highly accurate, even earlier breast cancer detection. Texas Breast Specialists has been designated a Breast Imaging Center of Excellence by the American College of Radiology for earning accreditation in mammography, stereotactic breast biopsy, and breast ultrasound.

Texas Oncology Surgical Specialists

Texas Oncology Surgical Specialists is a part of Texas Oncology. Our **surgical oncologist** removes tumors, often as part of a combination of treatment options, and may be before or after other treatments such as chemotherapy or radiation depending on a patient's specific needs. Our surgical oncologist works closely with medical and radiation oncologists to coordinate treatment for patients' overall care.

Our **gynecologic oncologist** performs surgery and other special procedures, such as robotic surgery, to diagnose and treat cancers that are specific to women.

More breakthroughs. More victories.
