Leading innovation in quality cancer care for Texans.

Texas Oncology uses evidence-based best practices to guide patient treatment across the network in a program known as Pathways, in collaboration with the National Cancer Collaborative Network. Texas Oncology physicians use these Pathways and programs to support genetic risk assessment, disease management, cancer survivorship, and advance care planning to improve the quality of the patients' cancer journey. At our comprehensive cancer centers, our patients access much of their treatment under one roof from a knowledgeable and supportive cancer care team,

TEXAS ONCOLOGY

Founded in 1986, Texas Oncology is a pioneer in high-quality community-

based cancer care. Texas Oncology is an independent oncology practice with more than 550 physicians and more than 300 sites of service across Texas and southeastern Oklahoma, including 50 comprehensive cancer centers. Our practice includes 320 medical oncologists, 64 radiation oncologists, 30 gynecologic oncologists, 157 surgeons, and more than 140 advanced practice providers. Texas Oncology's community-based approach of integrated subspecialty oncology care enables patients to receive leading-edge treatment while living at home and receiving the critical support of family and friends. More than 71,000 new cancer patients were seen at Texas Oncology last year.

including chemotherapy, patient navigation, social services, financial consultation, radiation, access to clinical trials, X-rays, PET, CT, other diagnostic imaging, lab, and pharmacy services.

Chimeric Antigen Receptor – T cell (CAR-T) therapy, which galvanizes the body's immune system to fight cancer, is one of the most promising treatment breakthroughs in recent years. Texas Oncology is one of the very few authorized centers in the country to initially provide CAR-T therapy.

Participation in leading-edge clinical trials.

Patients who are treated at Texas Oncology have the opportunity to participate in some of the most promising national clinical trials for a broad range of cancers. Texas Oncology's robust community-based clinical trials and research program has contributed to the development of more than 100 FDA-approved cancer therapies.

Wide scope of oncology subspecialties offer a broad range of services.

Nineteen specialties enhance the portfolio of cancer services Texas Oncology provides to the communities served.

Specialties include:

- Blood and marrow transplant
- Genitourinary oncology
- Gynecologic oncology
- Head and neck surgery
- Hematology
- Hepatobiliary surgery
- Medically integrated pharmacies
- Medical oncology
- Neuro-oncology
- Palliative medicine
- Pediatric oncology
- Radiation oncology
- Texas Breast Specialists
- Texas Center for Proton Therapy
- Texas Colon & Rectal Specialists
- Texas Imaging and Infusion Center
- Texas Oncology Surgical Specialists
- Texas Urology Specialists
- Thoracic surgeons

In addition, more than 300 certified oncology nurses work across the practice to meet the unique needs of oncology patients.

More breakthroughs. More victories.®

Texas Center for Proton Therapy

In Irving, Texas, provides physicians another advanced radiation treatment option. The center offers pencil-beam scanning and image-guiding proton therapy, treating cancer with proton means as small as two millimeters wide. The technology targets cancer cells with extreme precision, while minimizing damage to healthy tissue and allowing many patients to maintain quality of life during and after treatment.

Integration of health technology platforms to enhance care delivery and population health

Texas Oncology is a leader in innovative healthcare programs to reduce the cost of care and improve population health.

Texas Oncology's Genetic Risk Evaluation and Testing Program

provides an in-depth cancer risk assessment for individuals with a significant personal and/or family history of cancer.

Texas Oncology offers blood and marrow transplant services

in Austin and two locations in Dallas.

Texas Oncology connects

patients with resources such as nutritional counseling, social services, financial counseling, and support groups.
